Kev. Alonzo G. Shears, M. A., M. A., Rector.

HIS SCHOOL was established A. D. 1853, in the open country, only one mile from the State House. Since then very large outlays have been made for the enlargement and improvement of the grounds and Buildings. It offers, at low rates, rare inducements to parents seeking a first-class Institution for their sons .-All its pupils become members of the Rector's family, none boarding elsewhere. The location and extensive grounds insure the quiet peculiar to the country, so desirable to students and inviting to study, while health and happiness are promoted. The limited number of pupils tends greatly to their benefit, social as well as intellectual, including paternal or special care to young or backward boys. Pupils take frequent rides and rambles, under proper supervision; they also have the benefit of a thorough Military Drill. This establishment is warmed by Gold's very excellent Steam Heater, and furnishes warm and cold baths. Semi-annual sessions begin February 7th and August 7th; but pupils are admitted at any time. City Cars pass the School from the Steamboat Wharf and the Railroad Station.

Firculars, with Germs and Peferences.

The New Haven Directory for 1868,

Contains about 14,000 names, being an increase of 1,200 over those of 1867. 2,400 names have been erased, and 3,423 new ones are added. The number of changes of address are 3,050; total number of changes, 9,323.

We have been materially assisted in the compilation of names by the gentlemanly proprietors of most of our manufacturing establishments, who have cheerfully furnished us the names of their employees. We return our grateful acknowledgments.

During the past year the number of new buildings erected have been greater than for several preceding years. Among the number, the city has erected a large and beautiful school building—the "Skinner School," named in honor of the late Hon. Aaron N. Skinner, located at the corner of State and Summer streets. This school is designed to accommodate 600 pupils, having fifty seats in each of the rooms, of which there are twelve.

"The main building is 70 by 88 feet, and two stories high. Each story is divided into six rooms, with a hall ten feet wide in the centre. There is a projection in front 5 by 22 feet, which, besides extending the hall, gives closets on each side for teachers' clothing and for storing books, maps, &c. In the rear there is an addition 16 by 36 feet, which, besides a recitation-room connected with the principal's room, contains the stairs for the pupils, which being separated from the main building by a wall, will, in case of fire, be the last to be destroyed. The three rooms on each side of the hall are connected by door-ways, leaving a passage-way round the entire, building, near the outer wall. This plan was adopted for safety in case of fire."

Two church buildings have been erected during the past year. We append the description of each:

The West Congregational Church is an English Gothic structure, built of Naugatuck Granite, at a cost of \$30,000. It has a main corner tower and spire 125 feet high, with small offset tower on the opposite corner. The edifice is 50x90 feet, with a side wing 28x35 feet, for a chapel; with a room above for receptions, and for the Ladies' Society. The chapel is so arranged with sliding doors that it can be opened into the audience room, when it is needed. In its architectural grace and beauty of finish, it is one of the most pleasing buildings in the city. The architect is Mr. R. G. Russell, of this city.

The neat Gothic edifice erected for the First German Baptist Church, situated at the corner of George and Broad streets, is built mainly of

Family Scales

"SHALER'S FAMILY SCALE is a new and desirable article for use in families, and is worthy the especial attention of every housekeeper. It is the most complete thing of the kind we ever saw, and should be in every house in the nation. It has a face like a clock, and is so simple that a child can use it."

This is what the New York Independent and other papers of like standing say of Shaler's Family Scale. We invite the attention of all interested to call upon, or address, JOHN W. NASH & CO., 18 HOWARD STREET, New Haven, Conn.

INCOME LIST FOR 1867.

It is understood, of course, that the list by no means indicates the income of those whose names appear or do not appear in it, and is, therefore, a very unsafe guide in attempting to estimate any ones wealth. A deduction of \$1,000 is made in the first place. After that comes a deduction for State, National and local taxes, losses sustained by fire, shipwreck and other casualties, labor, interest on investments taxed directly, such as government securities, railroad stock and bonds, insurance and bank investments, rents of homestead, salaries derived from the United States, &c. Some of our wealthiest citizens do not appear in the list, or else appear as tax payers on a small amount, because they have already paid, in another form, all their obligations to the general government.

"SLUMBER ON."

"Slumber on! slumber on! There is beauty in death, All life-like and true, save the heave of the breath; And here shall man linger around the green sod, Communing with Heaven and purity's God, And feel they are treading life's confines upon; Then sleep thou, O beautiful! sleep, sleep sweetly on."

INVENTORS.

JOHN E. EARLE, 350 Chapel St., New Haven,

Gives his personal attention to procuring

PATEMIS

For INVENTIONS in the

UNITED STATES & FOREIGN COUNTRIES

A practice of more than fourteen years, and frequent visits to the Patent Office, has given him a familiarity with every department of, and mode of proceeding at, the Patent Office; which, together with the fact that he now visits Washington semimonthly to give his personal attention to the interests of his clients, warrants him in the assertion that

NO OFFICE IN THE COUNTRY

Is able to offer the same facilities to Inventors in securing their inventions by Letters Patent,—and particularly to those whose applications have been rejected, an examination of which he will make free of charge.

Preliminary examination, prior to application for patent, made at the Patent Office at a small charge.

His facilities for procuring Patents in FOREIGN COUNTRIES are unequaled.

Refers to more than one thousand clients for whom he has procured Letters Patent.

JOHN E. EARLE,

350 Chapel Street, (Cutler Building,) New Haven, Conn.

Our PICTURE KNOBS with SCREW are very far superior to the kind in market, with Nail in place of Screw, inasmuch as ours can be fastened firmly wherever it strikes a lath; while the Nail requires heavier timber in which to be driven, thereby making it impossible, in most instances, to place a picture precisely where desired.

HATCH'S Improved Fishing Reel,

DEALERS FOR H FISHING TACKLE

PATENTED JUNE 19, 1866.

The great advantage of this Reel over all other Reels in use, is that they are so constructed as to combine beauty, strength and utility, and being made by machinery, the parts are perfect, and fitted together so nicely that the Reel turns smooth and perfectly noiseless at a great velocity, winds in the line much faster and easier than any multiplying Reel, yet there is no gearing whatever connected with it. Another great feature of the Reel is, it is so arranged that it is impossible for the line to catch or tangle in winding in or out, as is the case with other Reels.

This Reel is attached to the pole in the ordinary way, by means of rings on the pole. That part which is attached to the pole, and the band which protects the wheel from all harm, is made of one solid piece of metal, thus making it far more durable than those made of many pieces, as is the case with other Reels.

HATCH'S PATENT

Taper Attachment.

CAN BE ATTACHED TO ANY ENGINE LATHE.

One of the greatest improvements that has appeared of late is Hatch's apparatus, as attached to an Engine Lathefor turning tapers. It is the cheapest and best thing known for that purpose. Send for circular, and see the testimony of some of the most prominent manufacturing companies in this State and Massachusetts.

INSURE WITH THE ${ t BROOKLYN}$

Life Insurance Company.

CHR. W. BOUCK, Pres't.

WM. M. COLE, Sec'y.

Among the advantages offered by the "Brooklyn," which thoroughly evince the determination of the officers to make it the most liberal Life Insurance Company in the United States, are:

1st. Total removal of all restriction on travel and residence. No permit or extra premium is required, and the assured are not necessitated to impose any geographical limit upon their engagements.

2d. A loan of one-third of the Premium; this loan is not deducted from the Policy in case of death, after two Annual Premiums have been paid.

3d. All Policies are non-forfeitable after two full annual Premiums have been paid.

4th. Rates as low as are consistent with financial soundness, and less than those of almost all Companies which accommodate their assured with loans.

5th. Dividends annually (after second year) in cash. Dividends are divided on the Contribution Plan,-the only equitable manner of dividing the earnings of a Life Insurance Company.

6th. Promptitude in paying losses. 7th. No charge for Policy or stamp.

The success which the "Brooklyn" has achieved, fully exemplified in its rapid and healthful growth, is a convincing proof of the confidence reposed by the public in its soundness, integrity and liberality.

The great object of the School is mental and moral culture in a preparation for College and for Business. Only a small part of the play time is devoted to Military Training; and it is by this use of hours, commonly worse than wasted, that the School has acquired any reputation as a Military Institution.

The regular course in the department preparatory to Yale College. occupies four years; but full opportunity is allowed to those who can

prepare more rapidly. Parents will find, in the instruction given in Military Drilling, Gym-

nastics, Swimming, etc., and in the ample grounds for out-door games, under careful supervision, just the advantages for physical training and vigor, which boys in cities need.

Further information as to the various departments to the Institute, and the terms, may be had by applying for catalogues, gratis, at the stores of H. H. Peck and T. H. Pease, or to

Hopkins Grammar School.

This Establishment has recently been greatly improved, and has two fine Sky-Lights, and many other improvements that are not usually found except in the leading galleries of large cities; and I am now prepared to offer to the admirers of the fine arts the highest inducement for patronage.

From the earliest introduction of the Photographic Art to America, my exertions have been untiring to perfect it in its application to every agreeable and useful purpose. I am now able to give my pictures a surpassing and unusual delicacy in their finish.

There is but little sameness in my positions and use of light, it being the design to show every face in its best light, forcible expression and starting animation, representing thought, action and feeling of soul.

Among the numerous kinds of pictures to be found at the rooms, are From the earliest introduction of the Photographic Art to America,

Portraits in Oil Colors from miniature to life size. Also a new style of I vorytype in oil colors that defies competition. Various styles of Water Colors, India Ink, Crayons, Ambrotypes, Melaineotypes—in short, every variety called for. Our Porcelain Pietures are acknowledged to be the very best made.
